Three Things You Should Know About Witch Craft

Three things you should know about witch craft:

1. Know that the universe is your mirror

Many of the religions insist that we, living beings on Earth, do not have any powers and that we should always pray (beg) to an unseen entity seemingly hidden above the clouds for all of our needs. Fortunately most of us who follow natural religions such as Wicca know that we are not just inert robots walking around at the mercy of unseen forces, but powerful spirits who have come to Earth to enjoy the human experience.

Wicca does not exclude other living beings or consider us humans superior in some way. All animate and inanimate entities are considered powerful with their own ways of life and a knowledge that transcends outward appearances.

We know that there is no Satan or Devil figures who are hell-bent on hurting others. All energy, positive and negative come from the living beings on Earth which includes what we see and many things that we are not capable of seeing, but may be accessible via spiritual communication.

The Universe includes everything we see and many things that we cannot. However, the only important thing to remember is that as long as you play nice, you don't have to worry about anything. For people who are fair, kind and giving, the Universe showers blessings galore. If people are distrustful, angry, jealous, criticize, greedy and see the world negatively, the Universe returns their message, sometimes three fold!

2. Follow your spirit

As stated above, there is no Goddess or God who is controlling and judging you. In fact, there is nothing in this universe to be afraid of. NO matter how many times someone is angry with you; they are the ones who will get negative messages from others (who are

part of the Universe). However, the more peace loving and caring you are, the more joyous your life will be.

Your spirit has the capability to create whatever you want or need! Learn to get in touch with your spirit (which is also part of the Cosmos) everyday by spending some time in meditation and avoiding the noise and pollution around you. Nature is our altar. Sit by a stream, or on top of a mountain or in the woods or by the Ocean and you will feel an amazing calmness come over you as you get in touch with your spiritual powers. Wish for whatever you need at that instant and you will create it.

Witchcraft is all about getting in touch with your spirit and creating magick through this power you were born with. When you are upset, don't depend on the outer world, but learn to depend on your own inner strength which originates from and is a part of the Universe.

3. Value everything

Witchcraft teaches us that we are all part of the same entity; this Universe which includes the Earth, other planets, the sky, Water, Wind and the entire cosmos! To hurt another is to hurt ourselves. To destroy a plant is to destroy our own food.

This way of life originated from the earliest human civilization which was created millions of years ago. No one knows for sure when the Earth was inhabited or how it came to being. There may be many other Earths or planets similar to ours in the Universe and all Universes surrounding us.

For an astronaut seeing the Earth far away from space, what most impresses them is how small the Earth seems to be. And yet, in each corner of our Earth, people are fighting each other and for what? People fight with other individuals, families fight with each other, cities fight about water and other resources, countries fight each other for oil, revenge and other nonsensical reasons.

Do we realize that we could be just one meteor away from total destruction? 2000, 2012 and whatnot, many "end of the world" theories have been propounded by religious enthusiasts and ancient hypotheses. However, what we need to remember is that every second of the day is precious and that we are not guaranteed anything in life. Being kind to each other and loving each other as kindred spirits will help our short existence on this Earth infinitely blissful.
